

FEATURES

- Multi-volt compatible
- Controls 3 – 5 indicators
- Compact design
- Easy installation
- Controls LED and incandescent lights
- IP67 rated

SEQUENTIAL INDICATOR CONTROLLER

MULTI-VOLT
12-30 VDC

HOUSING

WATERPROOF

1 YEAR
WARRANTY

Converting the ordinary into the extraordinary, Roadvision's RVSIM Sequential Indicator Module converts multiple individual LED or incandescent indicators into a dynamic chasing style system - illuminating the inner light first then progressing outwards before repeating the pattern. The RVSIM is designed to dynamically operate 3 - 5 indicators, giving you extra visibility when turning plus an added touch of class for your ride.

PART NUMBERS

RVSIM Dynamic Indicator Module

SPECIFICATIONS	RVSIM
OUTPUT TYPE	50cm wires to connect 5 lamps
CURRENT RATING	5A (1A per circuit)
OPERATING VOLTAGE	12-30VDC
